

ARTBA 2019 Bridge Report

Top 10 Most Traveled U.S. Structurally Deficient Bridges by State, 2018

State Rank	State	County	Year Built	Daily Crossings	Type of Bridge	Location
1	Alabama	Jefferson	1970	136,580	Urban Interstate	I65 over U.S.11,RR*City Streets
2	Alabama	Jefferson	1972	77,385	Urban Interstate	I-59/20 over US 31,RRs*City Streets
3	Alabama	Mobile	1966	71,940	Urban Interstate	I-10 WB * EB over Southern Drain Canal
4	Alabama	Mobile	1967	46,670	Urban Interstate	I-65 over Hells Swamp Creek
5	Alabama	Jefferson	1968	41,990	Urban Interstate	I 59/20 over Arron Aronov Drive
6	Alabama	Mobile	1964	33,574	Urban minor arterial	Mcgregor Ave over Eslava Creek
7	Alabama	Lee	1996	32,040	Urban freeway/expressway	US 280 over First Avenue
8	Alabama	Tuscaloosa	1956	31,380	Urban other principal arterial	US 82 over Hargrove Mill Creek
9	Alabama	Talladega	1935	25,590	Rural arterial	US 280 over Norfolk Southern R/R
10	Alabama	Lee	1959	23,680	Urban Interstate	I-85 over Long St
1	Alaska	Ketchikan Gateway	1957	15,147	Urban minor arterial	South Tongass Hwy over Hoadley Creek
2	Alaska	Ketchikan Gateway	1955	12,481	Urban minor arterial	South Tongass Hwy over Water St Viaduct
3	Alaska	Fairbanks North Star	1953	8,593	Urban minor arterial	Wendell Avenue over Chena River (Wendell)
4	Alaska	Anchorage	1966	6,768	Rural Interstate	Seward Highway over Portage Creek No 1
5	Alaska	Ketchikan Gateway	1975	6,277	Urban minor arterial	North Tongass Hwy over Ward Creek
6	Alaska	Fairbanks North Star	1953	5,325	Urban minor arterial	Minnie Street over Noyes Slough (Minnie St)
7	Alaska	Anchorage	1966	5,205	Rural Interstate	Seward Highway over Virgin Creek
8	Alaska	Anchorage	1966	5,205	Rural Interstate	Seward Highway over Glacier Creek
9	Alaska	Anchorage	1967	5,205	Rural Interstate	Seward Highway over Twenty mile River
10	Alaska	Anchorage	1966	5,205	Rural Interstate	Seward Highway over Peterson Creek
1	Arizona	Pima	1965	60,525	Urban Interstate	I 10; EB over Ruthrauff Rd
2	Arizona	Maricopa	1976	48,700	Urban other principal arterial	Shea Blvd over Indian Bend Wash
3	Arizona	Pima	1965	39,052	Urban Interstate	I 10; WB over Ajo Way; FAU 8173
4	Arizona	Pima	1965	39,052	Urban Interstate	I 10; EB over Ajo Way
5	Arizona	Coconino	1934	37,366	Urban other principal arterial	SB 40 over Rio De Flag
6	Arizona	Pima	1966	36,502	Urban Interstate	I 10; EB over Country Club Road
7	Arizona	Pima	1958	31,534	Rural Interstate	I-10 WB over Earp Wash Trib
8	Arizona	Pima	1958	31,482	Rural Interstate	I-10 EB over Earp Wash Trib
9	Arizona	Pima	1960	27,590	Urban Interstate	I-10 WB over Wilmot Rd
10	Arizona	Pima	1960	27,391	Urban Interstate	I-10 EB over Wilmot Rd

Data is from the Federal Highway Administration (FHWA) National Bridge Inventory (NBI), released March 14, 2019.

Effective January 1, 2018, FHWA changed the definition of structurally deficient as part of the final rule on highway and bridge performance measures, published May 20, 2017 pursuant to the 2012 federal aid highway bill Moving Ahead for Progress in the 21st Century Act (MAP-21). Two measures that were previously used to classify bridges as structurally deficient are no longer used. This includes bridges where the overall structural evaluation was rated in poor or worse condition, or where the adequacy of waterway openings was insufficient. The new definition limits the classification to bridges where one of the key structural elements—the deck, superstructure, substructure or culverts, are rated in poor or worse condition. During inspection, the conditions of a variety of bridge elements are rated on a scale of 0 (failed condition) to 9 (excellent condition). A rating of 4 is considered “poor” condition.

5	Kentucky	Jefferson	1960	75,342	Urban collector	Champions Trace Ln over S Fk Beargrass Creek
6	Kentucky	Jefferson	1972	75,109	Urban Interstate	I-64 over 3rd,5th,Rvr Rd,Belvedere
7	Kentucky	Jefferson	1984	70,626	Urban Interstate	I-265 over Avoca-Quarry Rd
8	Kentucky	Jefferson	1970	67,529	Urban Interstate	I-264 over P and L Railway Wye
9	Kentucky	Jefferson	1970	65,739	Urban Interstate	I-64 EB On Ramp over Mid Fk Beargrass Creek
10	Kentucky	Jefferson	1976	61,823	Urban Interstate	I-64 over Old P and L RR (7-13 St)

Data is from the Federal Highway Administration (FHWA) National Bridge Inventory (NBI), released March 14, 2019.

Effective January 1, 2018, FHWA changed the definition of structurally deficient as part of the final rule on highway and bridge performance measures, published May 20, 2017 pursuant to the 2012 federal aid highway bill Moving Ahead for Progress in the 21st Century Act (MAP-21). Two measures that were previously used to classify bridges as structurally deficient are no longer used. This includes bridges where the overall structural evaluation was rated in poor or worse condition, or where the adequacy of waterway openings was insufficient. The new definition limits the classification to bridges where one of the key structural elements—the deck, superstructure, substructure or culverts, are rated in poor or worse condition. During inspection, the conditions of a variety of bridge elements are rated on a scale of 0 (failed condition) to 9 (excellent condition). A rating of 4 is considered “poor” condition.

10	Ohio	Richland	1958	35,205	Urban freeway/expressway	US 30 over Erie RR Spur

Data is from the Federal Highway Administration (FHWA) National Bridge Inventory (NBI), released March 14, 2019.

Effective January 1, 2018, FHWA changed the definition of structurally deficient as part of the final rule on highway and bridge performance measures, published May 20, 2017 pursuant to the 2012 federal aid highway bill Moving Ahead for Progress in the 21st Century Act (MAP-21). Two measures that were previously used to classify bridges as structurally deficient are no longer used. This includes bridges where the overall structural evaluation was rated in poor or worse condition, or where the adequacy of waterway openings was insufficient. The new definition limits the classification to bridges where one of the key structural elements—the deck, superstructure, substructure or culverts, are rated in poor or worse condition. During inspection, the conditions of a variety of bridge elements are rated on a scale of 0 (failed condition) to 9 (excellent condition). A rating of 4 is considered “poor” condition.

8	Wisconsin	Racine	1959	38,800	Rural Interstate	IH 41 SB-IH 94 EB over Sth 11
9	Wisconsin	Kenosha	1959	38,800	Rural Interstate	IH 41 NB-IH 94 WB over Cth Kr
10	Wisconsin	Milwaukee	1969	35,262	Urban minor arterial	Cth Pp W Good Hop over Br Milwaukee River

Data is from the Federal Highway Administration (FHWA) National Bridge Inventory (NBI), released March 14, 2019.

Effective January 1, 2018, FHWA changed the definition of structurally deficient as part of the final rule on highway and bridge performance measures, published May 20, 2017 pursuant to the 2012 federal aid highway bill Moving Ahead for Progress in the 21st Century Act (MAP-21). Two measures that were previously used to classify bridges as structurally deficient are no longer used. This includes bridges where the overall structural evaluation was rated in poor or worse condition, or where the adequacy of waterway openings was insufficient. The new definition limits the classification to bridges where one of the key structural elements—the deck, superstructure, substructure or culverts, are rated in poor or worse condition. During inspection, the conditions of a variety of bridge elements are rated on a scale of 0 (failed condition) to 9 (excellent condition). A rating of 4 is considered “poor” condition.

ARTBA 2019 Bridge Report

Top 10 Most Traveled U.S. Structurally Deficient Bridges by State, 2018

State Rank	State	County	Year Built	Daily Crossings	Type of Bridge	Location
1	Wyoming	Natrona	1969	14,491	Urban other principal arterial	Wyo 220 over Bn RR
2	Wyoming	Teton	1969	13,000	Rural arterial	US 26 over Flat Creek
3	Wyoming	Sweetwater	1978	12,676	Urban other principal arterial	Wyo 530 over I80 Bus/UP RR
4	Wyoming	Natrona	1958	11,137	Urban Interstate	I-25 SBL over Wyo 255
5	Wyoming	Natrona	1958	10,975	Urban Interstate	I-25 NBL over Wyo 255
6	Wyoming	Laramie	1958	10,900	Urban Interstate	I-25 NBL over Cs RR
7	Wyoming	Natrona	1958	10,760	Urban Interstate	I-25 NBL over County Road 513
8	Wyoming	Laramie	1958	10,577	Urban Interstate	I-25 SBL over Cs RR
9	Wyoming	Teton	1960	10,000	Rural minor arterial	Wyo 22 over Snake River
10	Wyoming	Natrona	1969	8,758	Urban Interstate	I-25 SBL over Cnw RR
